

CYBERSECURITY Policy Library Development

It's critical for an organization to capture its security requirements, specify what security controls the technologies and business processes in use must provide, and to describe the steps it must take to implement these processes. These goals are best accomplished by developing a formal set of cybersecurity policies. A clear, comprehensive cybersecurity policy library that forms the blueprint from which technologies can be intelligently chosen and implemented in a fashion that consistently protects the business from unintended loss and harm.

CONSTANTLY
EVOLVING
security threats.

THE Consortium Solution

Most organizations are plagued by a general lack of awareness and understanding of fundamental threats to the business at all levels. The expert team at Consortium helps you implement an easily understand, concise policies that clearly map to your critical assets and services that end users will accept and support the overall process of securing your business operation. The Cybersecurity Policy library document enables you to forge a consistent strategy for correlating the needs of your business to the ongoing process of cyber risk management.

KEY STEPS WE TAKE TO Develop Your Security Policy Library

- Identify key stakeholders and their responsibilities.
- Review current de jure and de facto policies for useability in whole or in part for use in final document.
- Review current approval processes from an audit and compliance attestation perspective.
- Evaluate current communication processes between the information security/risk team and existing constituents, particularly for employee awareness and stakeholder visibility.
- Identify key asset areas including network and systems infrastructure, intellectual property, financial records, HR records, business partner/vendor shared data and connectivity, and business critical applications.

CYBERSECURITY POLICY LIBRARY Development Process

Consortium provides a remote Cybersecurity Management consultant who works with your team for data-gathering to build a high-level picture of your informational assets and value to your business. The process includes:

- Developing and documenting relevant policies to ensure ongoing confidentiality, integrity, and availability of key assets.
- Providing documented, customized security policy framework tailored to your business.
- Developing new policy statements and processes.
- Reviewing the final Master Policy Framework with your key personnel to ensure that the final output has adequately addressed the needs and concerns of each business unit.
- Conducting an online presentation summarizing the results for information security leadership and other key stakeholders.

When complete, Consortium delivers a formal indexed policy document based on industry best practices and conformant standards, specifically NIST Cyber Security Framework and NIST SP 800-53 v.5. The document will include defined governance processes and will be written in a functional and concise fashion so that it remains a living document, capable of evolving with the business.

ABOUT Consortium Networks

Consortium Networks is the trusted Cyber Concierge that helps our clients solve their toughest cybersecurity challenges. We are a cybersecurity risk, technology, and networking organization on a joint mission to connect and educate the community. We founded Consortium to change the “game” and help our clients make sense of the spaghetti labyrinth they call cybersecurity. By mapping our clients’ controls to industry standards and risk, we help them reduce complexity and risk to their organization and people. The outcome: clients will quickly understand their gaps and realize the impacts of their investment decisions, strengthening their cyber hygiene, and ultimately, protecting the business.

Our Concierge way of working sets us apart and follows four timeless principles of customer service: attitude, consistency, service, and teamwork. We are devoted to helping others selflessly in both our work and personal communities. For more information, visit consortium.net.
