

CYBERSECURITY Risk Assessment

As organizations continue to expand their information technology footprint to support internal and external customers, the exposure to the risk of cybercrime grows exponentially. To secure your IT infrastructure, it's critical to understand where you are most at risk for costly breaches that can be devastating to your business.

THE Consortium Solution

The expert team of cybersecurity professionals at Consortium helps you identify and prioritize where to direct your limited capacity by conducting a comprehensive cybersecurity assessment. We leverage industry standards and accepted frameworks along with our proprietary Metrics That Matter® (MTM) cyber risk quantification platform to obtain an objective view of your current cyber risk backed by empirical data. Our self-healing process offers recommendations to help rectify risk areas as we conduct the assessment.

CONSORTIUM

Quantify your
**CYBER RISK IN
DOLLARS**, and
identify and prioritize
areas of focus.

CONDUCTING THE Cybersecurity Risk Assessment

Consortium Networks works together with your team to establish a baseline, identify prioritized areas for improvement, and enable measurement of progress over time. Our two-phase approach not only conducts the cybersecurity risk assessment, but also helps you establish a Cyber Defense Organization (CDO) to ensure an ongoing structure to prevent cyber-attacks.

THE Cybersecurity Risk Assessment

The assessment has a threefold goal:

- Evaluate your current cybersecurity capabilities relative to your unique risk profile, quantifying risk in dollar terms.
- Provide prioritized recommendations to reduce overall risk posture.
- Benchmark your risk posture against peers in your industry.

Key Elements of the Assessment

- Leverage our MTM platform to quantify your cyber risk in dollars.
- Automatically map cybersecurity controls to relevant frameworks.
- Connect specific cybersecurity controls directly with the threats those controls mitigate.
- Understand your security, regulatory, and data sharing practices.
- Provide recommendations to close risk gaps and ensure systems security
- Assist in implementation of those recommendations.

Measurable Results

As a result of the assessment, you will gain:

- A complete understanding of the current state of your cybersecurity program.
- An overview of your cybersecurity tools and costs to renew, replace, operate, and maintain.
- An understanding of the efficiency and effectiveness of your current cybersecurity program.
- Comparison of your cybersecurity program to peers in your industry.
- An objective view of how potential investments may reduce your overall risk exposure.
- A prioritized view of your risk drivers and assets to identify optimal cyber spend allocation.

Following the assessment, Consortium Networks will offer its wide network of in-house and outside expertise to provide decision support on cybersecurity-related topics including threat landscape, trends in product development, efficient program organization, best practices in tool deployment, and procurement and contract negotiation advice.

Cyber Defense Organization (CDO)

Consortium partners with you to take your cybersecurity program to the next level:

CDO Deliverables

- Path to mature cyber defense addressing holistic program improvements including people, process, and technology.
- Mature fundamentals.
- Definition of new objectives resulting in cascading waves of impactful investment and improvement.
- Tools rationalization.
- Target Operating Model (TOM) for the cybersecurity program.
- Staffing structure to match the TOM.
- Methods to define and continuously track progress towards a target maturity state.
- Expansion and optimization of cyber defense operations.
- Routine maturity scoring.

This two-phase approach not only ensures that your cybersecurity program is effective against current threats, but that it will continue to evolve to defend against new threats as they develop.

ABOUT Consortium Networks

Consortium Networks is the trusted Cyber Concierge that helps our clients solve their toughest cybersecurity challenges. We are a cybersecurity risk, technology, and networking organization on a joint mission to connect and educate the community. We founded Consortium to change the “game” and help our clients make sense of the spaghetti labyrinth they call cybersecurity. By mapping our clients’ controls to industry standards and risk, we help them reduce complexity and risk to their organization and people. The outcome: clients will quickly understand their gaps and realize the impacts of their investment decisions, strengthening their cyber hygiene, and ultimately, protecting the business.

Our Concierge way of working sets us apart and follows four timeless principles of customer service: attitude, consistency, service, and teamwork. We are devoted to helping others selflessly in both our work and personal communities. For more information, visit consortium.net.
