

Key Benefits

- Our transparent and defensible implementation aligns with industry standard frameworks, providing a common set of cybersecurity threats based on MITRE ATT&CK.
- By mapping to NIST CSF, our system instantly shows coverage and maturity, helping with organizational reporting, investment decisions, and program enhancements.
- Utilizing real-world event risk data tailored to your organization, our system provides updated residual risk assessments based on inherent risk and control maturity.
- By focusing investment on actual threat sources and understanding event severity and potential impact, our system estimates loss probability and provides a portal and dashboard for your team to view security maturity trending, understand control change impacts, and compare against industry benchmarks.

MTM® Threat Defense Metrics offers a comprehensive overview of your threat landscape, enabling you to visualize potential attack vectors with ease. Leveraging the MITRE ATT&CK framework and our risk model, you can quickly identify areas of vulnerability and evaluate their severity using an intuitive grading system.

Our self-assessment process provides your organization with an all-encompassing view of coverage and maturity in relation to the NIST Cybersecurity Framework (CSF), using the CMMI framework as a reference. This process maps cybersecurity controls to the CSF and evaluates their readiness, giving you a better understanding of your compliance status.

Models and Scoring

 Our revolutionary solution utilizes machine learning models, developed using millions of data points from over 200,000 historical security events. These models are tailored to your specific organization, taking into account factors such as revenue, employee count, and primary NAICS code to provide the most accurate risk data.

 Our advanced algorithms process data from up to 58,000 near real-time calculations, providing a comprehensive annual risk assessment across 16 risk categories. Loss probability is calculated by balancing the overall risk a threat poses to your organization against the security controls and their maturity, as provided through a CMMI self-assessment.

 Our system provides a simple, easy-to-understand letter grade summary of your organization's control maturity, coverage, risk, and control redundancy, highlighting potential weak points in your security posture. With this information, you can make informed decisions and focus on the areas that need the most attention.

Metrics That Matter® Can Help You Show Measurable Results

Our advanced solution is designed to enhance your organizational reporting, investment decisions and program enhancements. With MTM®, you can easily guide your product maturity scores, giving you a clear understanding of your organization's strengths and areas for improvement.

The risk assessment algorithm estimates the loss probability due to threat occurrences, allowing you to take proactive measures to minimize risk.

MTM® also allows you to model and compare different scenarios, like control investment planning and improving implementation maturity, giving you the ability to make informed decisions and take the necessary steps to improve your organization's security posture.

MTM is free! Contact us today!

Benefit from MTM and get a quantitative, risk-based assessment of cybersecurity risk based on an organization's current safeguards and potential risks.

CONSORTIUM NETWORKS

Consortium Networks is the trusted Cyber Concierge that helps our clients solve their toughest cybersecurity challenges. We are a cybersecurity risk, technology, and networking organization on a joint mission to connect and educate the community. We founded Consortium to change the "game" and help our clients make sense of the spaghetti labyrinth they call cybersecurity. By mapping our clients' controls to industry standards and risk, we help them reduce complexity and risk to their organization and people. The outcome: clients will quickly understand their gaps and realize the impacts of their investment decisions, strengthening their cyber hygiene, and ultimately, protecting the business.

Our Concierge way of working sets us apart and follows four timeless principles of customer service: attitude, consistency, service, and teamwork. We are devoted to helping others selflessly in both our work and personal communities. For more information, visit consortium.net.
